**Update on L&T Order Wins: Do current Trends see signs of revival?**

- L&T has publicly reported order wins to the tune of Rs 143 bn during Q2FY13E. Most of these order wins have been from the low-margin Buildings, Factories & Residential projects (from Infrastructure segment) sub-segment. On a whole, we expect the company to report ~Rs 165 bn worth of project wins in Q2FY13E.
- If we look at the segment wise mix of these new projects won (as per order wins announced), ~65% of them are from the Infra segment and ~14% from Hydro-Carbons vertical.

**Q2FY13 Order Inflow Mix (Segment)**

**Q2FY13 Order Inflow Mix (Geography)**

Source: Company Filings; IndiaNivesh Research

- Further, if we look at geographical mix, then, ~87% of the project wins were from Domestic markets and the remaining project wins were from Middle-East markets (mainly from Oman, UAE).
- Post these order wins at Q2FY13E-end, we expect the order book of the company to be ~Rs 1,558 bn thereby giving revenue visibility for another 2 years.
- On one hand, we are seeing a trend that L&T has been impacted due to slow-down in award activity and on order hand management in their Q1FY13 concall sounded confident of attaining 15-20% growth in the order Inflows for FY13E.

L&T is expected to report ~11.8% increase in its H1FY13 order inflows when compared to H1FY12 numbers. This leaves the company with a quarterly run-rate of Rs 225.5-243.1 bn to attain 15-20% growth in FY13 Order inflows.

- After taking in to account the fact that, award activity happens to be more during H2, the volume of current quarter order wins are somewhat satisfactory. After taking in to account **recent reform announcements**, **there exists a possibility for the company to attain lower end of its FY13E guidance.**
- We would also like to highlight an emerging trend, here. In the last few quarters majority of the new order wins from the Infra segment have been from Buildings & Factories sub-segment. We are of the view that Buildings & Factories segment currently accounts for less than 5% of the order book. If other Infra sub-segments do not see a quicker revival than L&T may see marginal shift in its order book towards Buildings & Factories segment, thereby putting pressure on the margins. With likely cool down in raw materials prices, other operating levers coming into play we sense that it would address the impact of this low margin business.

**Valuation**

At CMP of Rs 1,630, L&T (on consolidated basis) is trading at FY13E and FY14E, P/E multiple of 18.7x and 16.8x, respectively.

## Company Update

Segment	Project	Date of Ann.	Location	Client	Cont. Val (Rs mn)
Infra	Construction of new integrated terminal at Chandigarh airport	13-Aug-12	Chandigarh	Airport Authority of India	6,740.0
