M.Cap. (USD b)	13.1			

* Including Para-IV/one-off upsides

Sun Pharma's 2QFY13 performance significantly above estimates. Key highlights:

- Sun Pharma reported 40% revenue growth to INR26.57b (v/s est of INR26.47b), a 49% EBITDA growth to INR11.68b (v/s est of INR10.6b) and 47% PAT decline to INR3.19b (v/s est of INR7.77b). It made a one-time provision of INR5.83b for the generic Protonix litigation in the US. Adjusted for one-off supplies to the US, we estimate core revenues at INR24.59b (in line with est), core EBITDA at INR10.68b (v/s est of INR9.6b) and core PAT at INR8.32b (v/s est of INR7.06b). Core performance was above estimates and led mainly by the strong performance at Taro and favorable currency.
- Guidance raised - management increased FY13E revenue growth guidance from 18-20% to 30-32% based on the strong performance in the first half.
- Announces DUSA acquisition - Sun also announced the acquisition of DUSA Pharmaceuticals (USA) for a cash consideration of USD230m, implying a valuation of 5x DUSA's CY11 sales and 20x EBITDA (refer details below).

Outlook and view: An expanding generic portfolio coupled with sustained double-digit growth in high-margin lifestyle segments in India could bring long term benefits for Sun. Its ability to sustain superior margins even on a high base is a clear positive. Key drivers for the future include: 1) ramp-up in the US business, 2) monetization of the Para-IV/low competition pipeline in the US, 3) launch of controlled substances in the US, 4) sustaining Taro's high profitability and 5) ability to leverage on DUSA's technology franchise. The stock is valued at 25.1x FY13E and 23.8x FY14E core earnings. Though we are positive on the company's business outlook, rich valuations have tempered down our bullishness. We maintain **Neutral** with a target price of INR730 (25x FY14E EPS). Inorganic initiatives (Sun has cash of over USD1b) are a key risk to our rating.

1

Investors are advised to refer through disclosures made at the end of the Research Report.

2Q performance was significantly above est - led by Taro, one-off supplies to US & currency

Revenues grew 40% to INR26.57b, driven by a strong 66% jump in US revenues to INR13.3b (growth was 38% in USD-terms). Price increases for key Taro products, favorable currency and one-off revenues for Doxorubicin were key drivers of US sales. One-off revenues in US mainly include supply of Doxorubicin under one-time supply arrangement allowed by the US FDA to bridge shortages.

Core Performance: Adjusted for one-off supplies to US, we estimate core topline at INR24.59b (in-line with est), core EBITDA at INR10.68b (vs est of INR9.6b) and core PAT at INR8.32b (vs est of INR7.06b). Core EBITDA margins at 43.4% (up 330bps YoY) were above our est of 39.1%.

Domestic formulations business recorded 15% growth YoY to INR8.1b (lower than our est of INR8.5b). Growth was partly impacted on account of the one-time sales booked by the company in 4QFY12. Management indicated that adjusted for this one-time impact, underlying sales growth was 19%.

Sales in RoW markets grew by 45% while constant currency growth was 21%.

Revenue Mix (INR M)

	2QFY13	2QFY12	YoY (%)	1QFY13	QoQ (%)
Formulations	25,125	17,604	42.7	24,954	0.7

Gross Revenues	27,008	19,211	40.6	26,974	0.1

Source: Company, MOSL

Core EBITDA was above estimates

Reported EBITDA margins at 44% were above estimates of 40% mainly led by Taro, favourable currency and one-off supplies of Doxorubicin. The company has made some changes in computing the cost of materials consumed and changes in inventory. Due to this change the translation gain on consolidation has been reflected in the forex currency translation reserve. If the company had not made this change, the PAT for 2Q would have been lower by INR369m.

EBITDA Trend

Source: Company, MOSL

2QFY13 Concall highlights

- FY13 Guidance Upgraded - Management has upgraded its topline growth guidance for FY13 to 30-32% from the previous 18-20% (consensus estimates were already much higher). 1HFY13 topline growth was ~51% implying that 2HFY13 growth will be lower. This is in-line with our expectations led by likely decline in Doxil supplies and high base of 2HFY12.
- US business - Management has reiterated that the price increase undertaken by Taro for some of its dermatology products may not be sustainable in the long-term. It also expects increased R&D investments to strengthen Taro's generic pipeline. Overall, ANDAs for 136 products are pending approval and the company expects to file another 25 in FY13. SUNP's future focus will be on filing more complex, difficult-to-manufacture products. We expect that temporary supplies of Doxorubicin to continue in 3QFY13 as well but may not sustain from 4Q onwards.
- India business - Underlying growth in this business remains strong. However, based on lower than expected 2QFY13 performance for domestic business, we have reduced our revenue estimates for FY13E and FY14E.

Taro performance - Profitability continues to be strong

Taro (Sun Pharma's subsidiary) recently reported 2QFY13 results with 16% topline growth, 33% EBITDA growth and 11% PAT growth (tempered down by absence of forex gains). The strong profitability is primarily led by lower competitive intensity in some of Taro's key dermatology products in the US, which has enabled the company to gain market share as well as take price increases. This has been the trend for the past 3 quarters. Management remains cautious of the increasing competition and consequential erosion of volume on some of these major products and the challenge in maintaining current performance. It has cautioned investors in the past that the current high profitability may not sustain once competition comes back to the market.

Proposes to acquire DUSA in US for USD230m - No immediate financial upside, long-term +ve

Sun Pharma has proposed the acquisition of DUSA Pharmaceuticals (USA) for a cash consideration of USD230m, implying a valuation of 5x DUSA's CY11 sales and 20x EBITDA. The company had reported a revenues of USD 45m for CY11 with PAT of USD7.3m. A significant portion of the proposed consideration will reflect as goodwill on Sun's books if the acquisition goes through.

Importantly, DUSA has USFDA's NDA approval to market its dermatology product, Aminolevulinic Acid HCL, for the treatment of moderate inflammatory acne vulgaris and general dermatological conditions. DUSA seems to be technologically driven company with access to certain proprietary technologies.

We do not expect any major financial upside for Sun Pharma from this acqn in the near-term, given the small size. While the valuation offered by Sun Pharma to DUSA shareholders seems to be rich, it intends to strengthen its presence in dermatology segment (both US and emerging markets) by unlocking the latent value in this proprietary franchise. We also note that Sun Pharma has a very good track record as far as inorganic initiatives are concerned.

US Generic Sales (INR m)

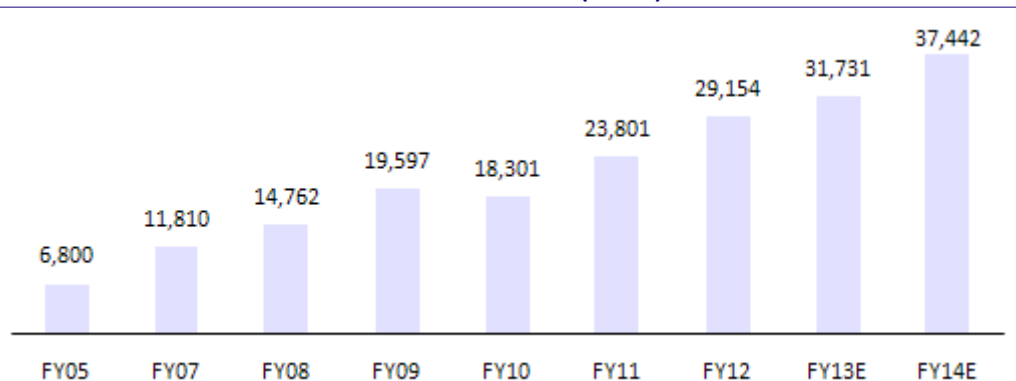

Source: Company, MOSL

Domestic formulations to report muted growth in FY13; Emerging markets portfolio to grow at ~35% CAGR

Given its strong positioning in the lifestyle segment, we expect Sun to sustain its underlying growth momentum in the domestic formulations business in the long-term. It is among the top players in the CNS, CVS, Gastro, Ophthalmology and Orthopedics segments.

This business has grown at 25% CAGR for FY08-12 partly aided by the one-time supplies of INR1.8b made in 4QFY12. This one-time sales is likely to have increased the inventory in the trade channels and hence will partly temper down domestic formulations growth for FY13.

Domestic Formulations Sales - Sustained momentum (INR m)

Source: Company, MOSL

We also believe that SUNP's emerging markets revenues are likely to grow at ~35% CAGR over next two years given its plans to increase its penetration in key markets. Management has indicated that its emerging markets business has good growth potential going forward.

Emerging market sales to grow at 35% CAGR (INR m)

Source: Company, MOSL

Valuation and view

An expanding generic portfolio coupled with sustained double-digit growth in high-margin life-style segments in India is likely to bring in long-term benefits for SUNP. Its ability to sustain superior margins even on a high base is a clear positive. Key drivers for future include: 1) Ramp-up in US business, 2) Monetization of the Para-IV/low-competition pipeline in the US, 3) Launch of controlled substances in the US, 4) Sustaining Taro's high profitability & 5) Ability to leverage on DUSA's technology franchise. Post the 2QFY13 results; we have upgraded our core EBITDA est for FY13E and FY14E by 6% and 3%. However, our EPS estimates remain largely unchanged due to lower other income.

The stock is currently valued at 25.1x FY13E and 23.8x FY14E core earnings. While we are positive on SUNP's business outlook, rich valuations have tempered down our bullishness. Price increases for certain products by Taro (due to absence of competition), positive impact of a favourable currency and temporary Doxil supplies to US were the key reasons for the significant increase in growth and profitability for SUNP in 1HFY13. Of these, the significant jump in profitability at Taro is not sustainable in the long-term and is likely to reverse post the re-entry of some of the competitors. Doxil supplies are likely to taper off as J&J has re-entered the US market. Tax rate for FY13 will be ~18% compared to 11.4% for FY12. We maintain Neutral with target price of INR730 (25x FY14 EPS). Inorganic initiatives (SUNP has cash of over USD1b) is a key risk to our rating.

Sun Pharmaceuticals: an investment profile

Company description

Sun Pharma is among the largest players in the domestic formulations market and the most profitable one. It makes and markets specialty medicines and APIs for chronic therapy areas such as cardiology, psychiatry, neurology, etc. Sun has forayed into regulated markets by acquiring majority stake in Caraco Pharma and has strengthened its presence in US by recent acquisition of Taro.

Key investment arguments

- Ability to identify niches in long term therapy areas with high entry barriers and build strong franchise to ensure sustainable growth and high margins.
- Sustaining superior profitability on higher base is a strong positive.
- One of the strongest ANDA pipelines from India with 135 ANDAs pending approval. The pipeline includes a combination of low-competition, patent challenge and normal product opportunities.

Key investment risks

- Unresolved USFDA issues related to Caraco's manufacturing facilities will continue to impact sales in the US and pending ANDA approvals from that facility.

- Capability to scale up exports, particularly to unregulated markets, is yet to be fully demonstrated.

Recent developments

- Announced the acquisition of DUSA Pharmaceuticals (USA) for a cash consideration of USD230m.

Valuation and view

- While we are positive on SUNP's business outlook, rich valuations have tempered down our bullishness.
- The stock is currently valued at 25.1x FY13E and 23.8x FY14E core earnings. Maintain Neutral with TP of INR730 (25x FY14E EPS)

Sector view

- Emerging markets and USA would remain the key sales and profit drivers in the medium term. Japan is expected to emerge as the next growth driver for generics in the long-term.
- We are overweight on companies that are towards the end of the investment phase, with benefits expected to start coming in from the next fiscal.

Disclosures

This report is for personal information of the authorized recipient and does not constitute to be any investment, legal or taxation advice to you. This research report does not constitute an offer, invitation or inducement to invest in securities or other investments and Motilal Oswal Securities Limited (hereinafter referred as MOST) is not soliciting any action based upon it. This report is not for public distribution and has been furnished to you solely for your information and should not be reproduced or redistributed to any other person in any form.

Unauthorized disclosure, use, dissemination or copying (either whole or partial) of this information, is prohibited. The person accessing this information specifically agrees to exempt MOST or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold MOST or any of its affiliates or employees responsible for any such misuse and further agrees to hold MOST or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.

The information contained herein is based on publicly available data or other sources believed to be reliable. While we would endeavour to update the information herein on reasonable basis, MOST and/or its affiliates are under no obligation to update the information. Also there may be regulatory, compliance, or other reasons that may prevent MOST and/or its affiliates from doing so. MOST or any of its affiliates or employees shall not be in any way responsible and liable for any loss or damage that may arise to any person from any inadvertent error in the information contained in this report. MOST or any of its affiliates or employees do not provide, at any time, any express or implied warranty of any kind, regarding any matter pertaining to this report, including without limitation the implied warranties of merchantability, fitness for a particular purpose, and non-infringement. The recipients of this report should rely on their own investigations.

This report is intended for distribution to institutional investors. Recipients who are not institutional investors should seek advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents.

MOST and/or its affiliates and/or employees may have interests/positions, financial or otherwise in the securities mentioned in this report. To enhance transparency, MOST has incorporated a Disclosure of Interest Statement in this document. This should, however, not be treated as endorsement of the views expressed in the report.

Disclosure of Interest Statement

Sun Pharmaceuticals

Analyst Certification

The views expressed in this research report accurately reflect the personal views of the analyst(s) about the subject securities or issues, and no part of the compensation of the research analyst(s) was, is, or will be directly or indirectly related to the specific recommendations and views expressed by research analyst(s) in this report. The research analysts, strategists, or research associates principally responsible for preparation of MOST research receive compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors and firm revenues.

Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOST & its group companies to registration or licensing requirements within such jurisdictions.

For U.K.

This report is intended for distribution only to persons having professional experience in matters relating to investments as described in Article 19 of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (referred to as "investment professionals"). This document must not be acted on or relied on by persons who are not investment professionals. Any investment or investment activity to which this document relates is only available to investment professionals and will be engaged in only with such persons.

For U.S.

MOST is not a registered broker-dealer in the United States (U.S.) and, therefore, is not subject to U.S. rules. In reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") and interpretations thereof by the U.S. Securities and Exchange Commission ("SEC") in order to conduct business with Institutional Investors based in the U.S., Motilal Oswal has entered into a chaperoning agreement with a U.S. registered broker-dealer, Marco Polo Securities Inc. ("Marco Polo"). Any business interaction pursuant to this report will have to be executed within the provisions of this Chaperoning agreement.

This report is intended for distribution only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the Exchange Act and interpretations thereof by SEC (henceforth referred to as "major institutional investors"). This document must not be acted on or relied on by persons who are not major institutional investors. Any investment or investment activity to which this document relates is only available to major institutional investors and will be engaged in only with major institutional investors.

The Research Analysts contributing to the report may not be registered/qualified as research analyst with FINRA. Such research analyst may not be associated persons of the U.S. registered broker-dealer, Marco Polo and therefore, may not be subject to NASD rule 2711 and NYSE Rule 472 restrictions on communication with a subject company, public appearances and trading securities held by a research analyst account.
